

GNI ReSound

Lynx™

The perfect alert system for an enriched and active lifestyle.

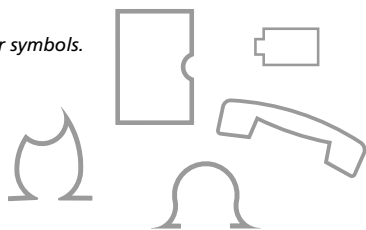

The Lynx MiniVib is your key to a more carefree life.

The Lynx system has been developed to help those of you that require a little awareness assistance of common events in your every day life. We are known for our previous products that call attention when the doorbell or the telephone rings, or when fire alarms are activated.

We are now proud to present the innovative Lynx MiniVib. The MiniVib is a discreet, wireless alert indicator that can be worn on your wrist, arm or ankle, keeping you well aware of various events around you.

Five clear symbols.

Everyone has the right to feel safe and secure in their own environment. A discreet alert system makes it easy to relax.

People of all ages in need of hearing assistance are enjoying a full and rewarding lifestyle, thanks to modern technology. With the Lynx system, we offer you the best alert system on the market.

The Lynx MiniVib is the most advanced alert indicator available and is a wonderful example of just how far technology has progressed. The MiniVib is light-weight, discreet and not only provides real security, but a large measure of freedom and comfort as well.

The unique MiniVib is designed to provide secure awareness around the clock.

Seldom has such a small device made such a big difference in the everyday lives of so many people. The elegant Lynx MiniVib alerts you with pulsing vibrations and lighted indicators that keep you aware of what's happening around you, even without a hearing instrument.

Compact and discreet: This is the smallest and lightest alert indicator on the market. You can wear the MiniVib around your wrist or arm and even around your ankle, making it nearly unnoticeable.

Clear alert indicators: The basic function of the MiniVib is to generate different pulses of vibration as well as lighted indicators in response to various alert activities. This provides acute awareness of every situation.

Peace of mind: Thanks to the MiniVib you can feel safe and secure 24 hours a day. Awareness breeds confidence.

Water resistant and durable: The MiniVib is also water resistant. The case is elegant, robust and durable. The flexible strap makes it easily adaptable when you need to work freely with both hands.

Easy to use: The MiniVib is simple to use and the lighted diodes are clearly visible. When you put the MiniVib in night-time mode, all alert modes except the fire and wake up alarms are disabled. The unit operates on rechargeable batteries.

Lynx MiniVib. Your perfect awareness companion.

The Lynx system includes a flexible line of products of the highest quality.

- Transmitter
- Receiver
- Repeater

Lynx Telephone Transmitter

Lynx Flash

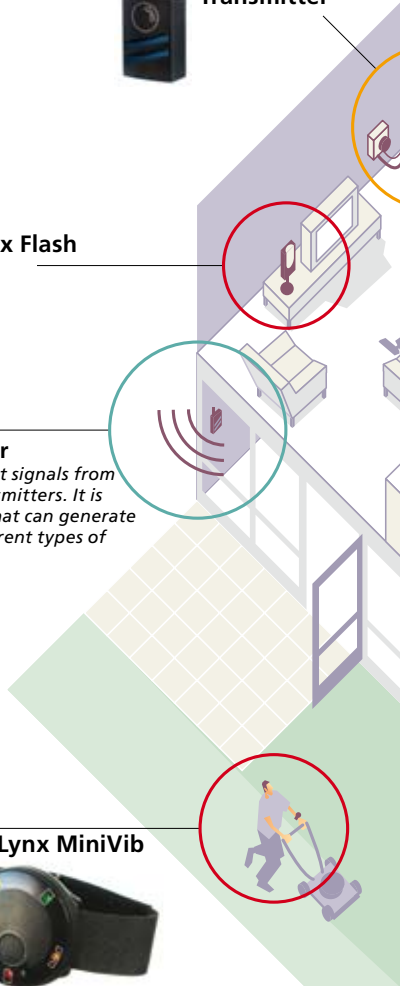

Lynx Repeater

Strengthens alert signals from the various transmitters. It is also a receiver that can generate alerts with different types of sound signals.

Lynx MiniVib

The Lynx

(Latin: Lynx Lynx)

Even though the lynx lives among us, they are seldom seen. A mystical and tireless hunter, always aware, they rarely miss the mark.

The high-tech leader

It takes a special kind of company to set the pace of technological development for the international hearing industry. Thanks to our position as one of the largest hearing instrument manufacturers, a dedicated staff of more than 3,400 and a tradition of company-wide innovation, GN ReSound is widely recognized as the hearing industry's leader in innovation.
